# UNICOVER FLEX SOFT COVERS

Our most popular solution with the XU Series Unibind Systems and the latest Unibinder series with crimper. UniCover Flex soft covers are the right solutions for any document presentation. With a crystal-clear sheet on one side and a matt-frosted finish on the other side it's your choice of impression. The steel spine guarantees a solid, durable bind.

With the Unibinder series the open spine will be closed and crimped to a neat finish and reduce the amount of covers you need to stock. See Chart below. With the XU Series you can bind with multiple spines.
